RE: Kansas Open Records Request

Dear Mr. Kendall:

I am in receipt of your October 8, 2007 e-mail requesting "records showing when District Attorney Phill Kline used his key card to enter and leave the courtyard area from January 11, 2007, to the date at which you begin this request." Enclosed please find records responsive to your request. There are three separate reports covering portions of the requested time frame. The reports dated February 5 to May 2, 2007 and June 18 through August 14, 2007 were generated and retained in response to the case referenced in your letter. The third report, August 14 through October 10, 2007, was generated in response to your current request.

Please note that no information is provided for the time periods from May 2 to June 18 and prior to February 5. We do not have any records related to your request during those time periods because of the manner in which the courthouse security system functions. Due to storage limitations and retention settings in the security system, older information is overwritten by more current information when the capacity limits of the system are reached. That occurs consistently with the courthouse security system and we do not store data beyond that, except for the two reports generated and retained at an earlier date.

Sincerely,

A handwritten signature in black ink, appearing to read "Cynthia Dunham".

Cynthia Dunham
Assistant County Counselor
